DETAILED ACTION

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

A programmable serializing data path species, depicted in Figure 4, readable upon claims 1-8.

A programmable logic device species, depicted in Figure 1, readable upon claims 9-16.

A serializing method species, depicted in Figure 11, readable upon claims 17-22. As best understood, the "data paths" and "programmable logic devices" recited in claims 23-31 are drawn to this species, not the species shown in Figures 1 and 4.

A programmable timing circuit species readable upon claims 35-37. This species should be illustrated by a figure, but currently is not shown.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2819

Drawings

The drawings are objected to because of the following informalities:

- Figure 1: Change "device" to -- device --.
- Figure 2: Change "programmabl" to -- programmable --.
- Figure 4: Change "programmabl" to -- programmable --.
- Figure 7: Change "programmabl" to -- programmable --.
- Figure 7: Change "divid r" to -- divider --.
- Figure 10: Change "parall l" to -- parallel --.
- Figure 10: Change "s rial" to -- serial --.
- Figure 10: Change "modul" to -- module --.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick G. Wamsley whose telephone number is (571) 272-1814. The official facsimile number is (703) 872-9306. An alternate facsimile number, (571) 273-1814, should only be used for unofficial documents.
